

Italian University recognizes CFUs for students with international mobility experiences

The objective of the proposal is to guarantee to each university student up to 6 training credits for their active participation in the European Erasmus Plus program. An opportunity to promote the ERASMUS PLUS program

.

The proposal, which will be sent to the Ministry of Education, the Rectors' Conference and the Italian and European Parliamentary Institutions, was presented during the first edition of the Young Leaders International Meeting, attended by 60 young people from all over the Old Continent , an event funded by "Erasmus Plus" to discuss how to improve national youth policies.

This legislative proposal is born out of the daily report with many young people who, once participated in this European program, find themselves concluding learning activities with a wider knowledge bag, we feel it is right to give adequate recognition in terms of training credits, so even to stimulate other students to participate.
