

Have 33% off for all students with valid ID

This will be valid for students in full time education from any age from 16 til you graduate. Any person below this age will get a child ticket anyway.

This will need to have the students name age and date of birth it will also include a valid date of study.

The ID card will include where your studying.

This will loose the government a lot of money. Saying this it will also help the shops gain money as the money we students save can be spent elsewhere either in shops or in restaurants. Us students that study at university already have to pay a fee of £9,000 a year alone for their education. This is without accommodation which will lead to a staggering £15,000 each year on average per each student.

This is a lot of money that most students do not have.

Saving a third on all public transport will also help the environment as the students will not be using their cars to get to and from universities or colleges.
