Social Issue

Inclusion of disabled children in schools.

Brief description of the Project Idea

Disabled children ~~do~~ aren't totally integrated in schools with the other kids. Therefore, they can feel separated.

Our solution is to create an organization or a place in schools for disabled children.

Their function would be:

- Prepare and adapt school gyms for disabilities
- optimize school system of mobility and accessibility
- Form / educate teachers / gym teachers *
- create ^{sport} activities for ~~the~~ disabled and non-disabled people to play together
- ~~bring~~ activities → Educate non-disabled children for this situation.
- gather together other disabled children from other schools in town to activities outside school
- Create teams and leagues of a sport in every city. where they can play with other teams. And have championships.
