**Summary of the project**  
Short overview of the project

The project ~~aims to~~ is a long term project that aims to educate different actors of the societies involved (household members, social workers, future parents) to build a more sustainable household routine, within The project will take place within a year and will include international trainings and local activities for dissemination.

In the trainings participants will receive information on including sustainability within the household, exchange good practices, learn pedagogical techniques for early environmental education and start free-cycle social media groups.
